JUST TO REASSURE YOU

We are aware that this is an extremely uncertain time for everyone, and here at Jacob UK we want to assure our customers that we have quickly and efficiently established precautionary measures to try to mitigate the risk involved for all of our employees and their families by asking over half of the staff to work from home. This will enable us to continue supporting your requirements and any queries you may have.

This situation is unprecedented and the steps we have already taken will be constantly reviewed and we will do our very best to offer our usual efficient service.

We have also increased our UK and German stockholding to ensure that interruption to supply is as minor as possible.

Site visits to customers are currently suspended, although we will do our very best to offer technical expertise and advice by phone/email. Please continue to send in enquiries in the normal way.

All the best from Kim and the team at Jacob UK.
